years in enterprise IT and digital transformation

3→31
digital department built and led at an IDX-listed manufacturer

56+
digital, AI and IoT products for 5,000+ employees

$318K+
documented impact, verified in the 2024 annual report

#1
Global AI Demo Day 2026, Bengaluru

PROFILE

I bring AI into company operations. At PT Sat Nusapersada Tbk, an IDX-listed electronics manufacturer for Xiaomi, Lenovo, Asus and Motorola, I built the digital department from 3 to 31 people and shipped 56+ products used by 5,000+ employees. Before that: 7 years of enterprise IT in Singapore (MPA, Thales, DHL) and a sea-transport startup with Indonesia's Ministry of Transportation. Today, as founder of INDUSIA.ai, I build and run AI systems end to end: product, on-premise factory servers, cloud, backups and security. I also train company teams and speak about applied AI.

EXPERIENCE

2026 – now
Batam · global

Founder & CEO

INDUSIA.ai · PT Indusia Kecerdasan Digital · AI for factories and logistics

- Built and deployed a dual-side AI PCB inspection system that replaces legacy AOI at an electronics manufacturer in Batam: 2 production lines live, ≥95% defect-detection SLA aligned to IPC-A-610.
- Delivered Smart Fleet, a logistics platform live at a Batam container-trucking operator: RFID gates, fuel telemetry, container pairing, automatic e-POD.
- Run all infrastructure personally: on-premise edge servers on factory lines (offline-first), cloud, CI/CD, backups, access control.
- Design AI solutions for manufacturing, logistics, FMCG and retail clients; lead a distributed team and integration partners.

2023 – 2025
Batam

Head of Digital Transformation & Process Automation

PT Sat Nusapersada Tbk (IDX-listed EMS)

- Built and led a cross-functional team of 31 engineers, designers and analysts delivering 56+ AI, IoT and digital products for 5,000+ employees.
- $318K+ documented impact (2024 annual report) and 25% faster time-to-market.
- Shipped MySATNUSA, a super-app for 5,000+ daily users across 8 departments: 30+ workflows, 40% less admin overhead, 99%+ uptime.
- AI visual inspection: 98% accuracy, 75% faster processing, $200K+ annual savings; IoT monitoring added 30% efficiency.

2021 – 2023
Batam

Process Engineering Manager

PT Sat Nusapersada Tbk

- Raised SMT assembly productivity 20%; pass rate +25% and rejections −20% with SPI and AOI.
- Led SMT–MES integration under Agile: 35% operational efficiency gain, 99% line efficiency.

EXPERIENCE (CONT.)

2016 – 2019
Batam

Co-Founder & CEO

Marlin Booking · sea-transport technology

- Digitised passenger port operations with Indonesia's Ministry of Transportation at 5 ports.
- Mobile ticketing for Singapore–Malaysia ferry routes: +20% customer satisfaction, +15% sales. Raised $250K at a $5M valuation.

2008 – 2015
Singapore · 7 years

Enterprise IT

MPA Singapore · Thales (ex Gemalto) · DHL Supply Chain · eXSYS

- Application development, solution support and software engineering for port authority, telco and supply-chain systems in APAC (J2EE, Oracle, Linux).
- DHL: −25% downtime, zero security breaches in two years.

SELECTED WORK AT INDUSIA.AI

- **AI PCB Visual Inspection** — Live. Dual-side defect detection on edge hardware, ≤30 ms per image, fully on-premise.
- **Smart Fleet** — Live. Container-trucking platform: RFID gates, fuel telemetry, e-POD, owner voice assistant.
- **Sparkfluence** — Live. AI short-form video SaaS; champion of Global AI Demo Day 2026.
- **Autonomous content engine** — Live. alisadikinma.com researches, writes and publishes with human approval.
- **Indusia Accounting & Finance** — Built. Legacy desktop accounting moved to the web; Indonesian tax app.
- **Merchant POS & Attendance SaaS** — Built. QRIS-ready multi-tenant POS; face + GPS attendance.

RECOGNITION

#1
Global AI Demo Day 2026
Bengaluru, India. Sparkfluence chosen out of 26 startups.

1/48
UN-UNCTAD × Alibaba eFounders
Hangzhou, China, 2019. One of 48 founders from 16 countries.

#1
Telkomsel The NextDev 2018
Transport category with Marlin Booking.

WC
Fenox Startup World Cup 2017
Wild Card winner; grand finale in Silicon Valley.

SKILLS

AI agents · RAG · Computer vision (YOLO, anomaly detection) · Edge AI (Jetson) · Local LLMs · RPA / n8n · SMT · MES · AOI/SPI · IPC-A-610 · PLC (Modbus TCP / OPC-UA) · IoT monitoring · Laravel · Vue / React / Next.js · NestJS · FastAPI / Python · PostgreSQL · Flutter · Docker / Linux · CI/CD · Agile / Jira · Digital roadmap & ROI

EDUCATION & CERTIFICATIONS

- BINUS University — Bachelor, Informatics Engineering, cum laude (2019)
- Politeknik Caltex Riau — Diploma, Computer Engineering, cum laude (2007)
- Google Project Management: Professional Certificate
- Outskill AI Generalist Fellowship
- UN-UNCTAD × Alibaba eFounders Fellowship (2019)
